

CSS-3 Flexbox & Media query

→ Flexbox **

Position → top, bottom, left, right

↓
Static

relative

vs

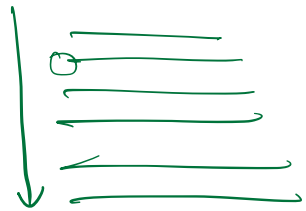

absolute

↓

element wrt
its original position

↓

element wrt it window
position

Fixed & Sticky

↓

Element is set
wrt to window
even if you
scroll element is fixed

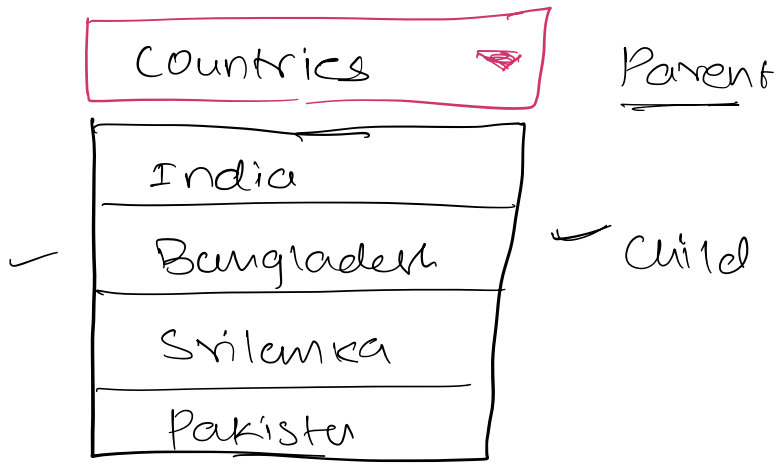

the behavior of sticky
changes when you
scroll

Absolute → wrt window
→ configured such that
it works/move with respect
to parent element

{ <div> → Position: relative
 {
 { } → Position: absolute
 { </div>

input

type: dropdown

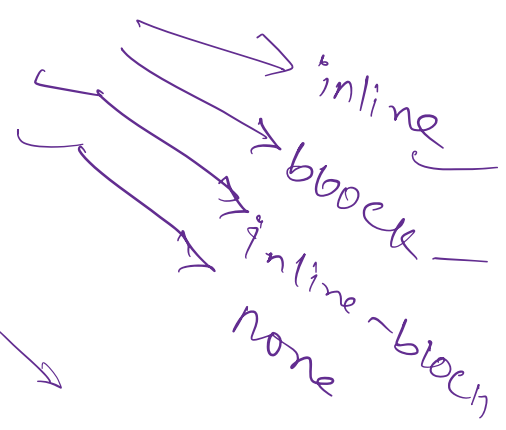

Flexbox:
